Summary

Bilingual Full Stack Developer with experience in cloud architectures (AWS), modern web development, and IoT integrations. Proven track record in designing scalable systems using React, Node.js, and Python, coupled with hands-on expertise in Linux environments, Bash scripting, and containerization. Focused on creating efficient, creative solutions, automating deployments, and applying Agile methodologies.

Technologies and Tools

Development Technologies: Python (Django, Flask), JavaScript (React, Next.js, Node.js), Java, C++, Dart (Flutter)

Infrastructure & Cloud: AWS, Firebase, Docker, OpenStack, Linux (Bash Scripting), Reverse Proxies

Databases & Tools: PostgreSQL, MySQL, MongoDB, Git, Render, Vercel, Visual Studio Code

Languages: Spanish (Native), English (Advanced C1 - Duolingo 130/160, EF SET 68/100)

Experience

Software Developer – R&D Project (UNIMINUTO Riego PWA)

Villavicencio, Colombia

Corporación Universitaria Minuto de Dios – College

May 2025 – May 2026

- Architected and delivered ‘UNIMINUTO Riego PWA’, an offline-first Progressive Web App using React, Next.js, Python, and PostgreSQL for automated IoT irrigation systems.
- Optimized agricultural resource efficiency through real-time remote monitoring, establishing a functional system robust enough to support an upcoming academic publication.
- Implemented Agile (Kanban) methodologies for lifecycle management, seamlessly integrating complex hardware components with cloud-based software.

Projects

Cloud Infrastructure & Server Deployment

May 2026

- Configured and deployed scalable server environments using Docker and OpenStack.
- Implemented a reverse proxy and NFS file sharing, optimizing network traffic, improving system security, and ensuring data accessibility.
- Developed and integrated a ‘Tip of the Day’ (TotD) application to demonstrate seamless containerized deployments in production-like environments.

Additional Experience

Tech & Sales Advisor

Villavicencio, Colombia

DUG Store

Nov 2024 – Feb 2025

- Applied consultative sales strategies and resolved conflicts agilely, ensuring high customer satisfaction.

Technical Skills Coach

Villavicencio, Colombia

Panteras Basketball Club

July 2024 – Dec 2025

- Led teams and mentored individuals using assertive communication, enhancing group performance and discipline under pressure.

Education

Tampere University of Applied Sciences (TAMK)

Tampere, Finland

Movemos tu Mundo Scholarship Recipient in International Academic Exchange (Software Engineering)

Jan 2026 – June 2026

- Awarded the Movemos tu Mundo Scholarship for academic excellence and international projection.

Corporación Universitaria Minuto de Dios

Villavicencio, Colombia

Undergraduate Degree in Software Development Technology

Feb 2023 – June 2026

- Graduated **Cum Laude** with a **4.62 / 5.0 GPA**, earning an automatic postgraduate merit scholarship for academic excellence.
- Awarded Honor Scholarship (2023-2024) and Academic Excellence Award (2024) for the highest GPA in the program.
- Aclaimed participation in the 2026 RedColSi conference, presenting a research paper on ‘UNIMINUTO Riego PWA’ and its impact on sustainable agriculture through IoT integration.
- Relevant Coursework: Cloud Computing, Big Data, Data Structures, Agile Methodologies, Databases.

Certifications

Building GenAI Applications, CRUD Operations, and Relational to Document Model

2025
